Subject: New Cyber Security Resources Provided by Enduris

Dear Member,

Enduris is announcing a free value-added service for members in relation to Cyber Security.

Enduris now provides complimentary access to KYND, a set of tools to help you protect your organization from cyber risk.

What does this mean for members?

Enduris has partnered with KYND to provide members with free access to the KYND ON dashboard and KYND Signals Report, aiming to strengthen your organization's cyber risk management posture.

KYND ON is a powerful cyber risk management tool that provides continuous monitoring and regular assessment of the external cyber vulnerabilities facing your organization.

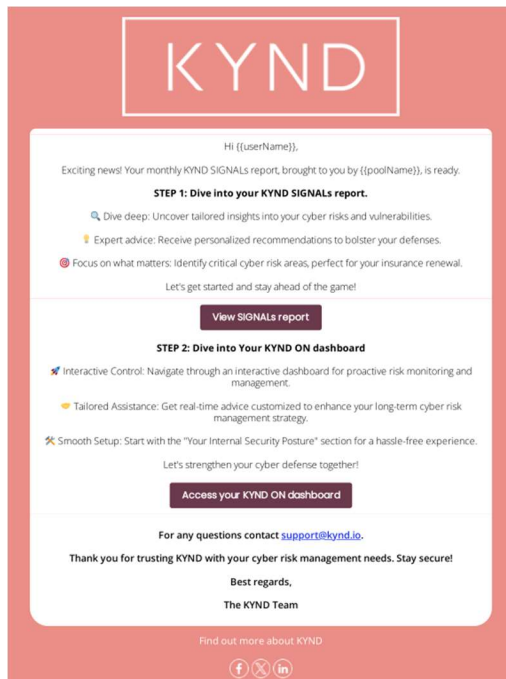

The KYND Signals Report summarizes the information available within your KYND ON platform and will be sent each month with a prioritized risk overview and clear remediation recommendations to help you understand which measures to address first, fix the identified issues, and enhance your cyber security profile.

Why are we doing this?

Enduris is continuously looking for ways to enhance the protection that we offer members. We believe that the cyber risk intelligence that KYND can provide you will be valuable in safeguarding your organization from cyber threats.

Next steps

An email will be sent to the main member contact containing your district's latest KYND Signals Report (sample included below). Follow the links in that email to review the report and sign in to your KYND ON Dashboard.

About KYND

Founded in 2018 with a mission to help organizations see, understand, and manage cyber risks easier and quicker than ever before, KYND has emerged as a trusted cyber partner for organizations worldwide, offering actionable cyber risk intelligence combined with expert advisory support to help their clients take firm control of cyber risks. More information on KYND is available at www.kynd.io.

Thank you for being a valued member of Enduris!

Sincerely,
Joe Davis
Director of Member Relations and Risk Management
